Urban Dynamics and Spatial Balance Challenges in Lomé: Toward an Integration of Mineral, Wetland, and Green Spaces for Urban Well-Being

Published On: October 02, 2026 | Pages: 025 - 032

Author(s): Komlan Déla Gake*, Ndonaye Allarane, Modeste Yaovi Awoussi and Coffi Cyprien Aholou

Greater Lomé emblematically illustrates the contradictions of sub-Saharan African metropolises, caught between rapid population growth, informal spatial expansion, and increasing climate vulnerabilities. The horizontal sprawl of Grand Lomé, marked by high annual consumption of natural and agricultural spaces, occurs in a context of significant mineralisation, fragment ...
